

3DEA® CARE wheelchair seat cushion

**Breathable, pressure relieving seat cushion
with incontinence protection**

3DEA® provides an ideal microclimate within the cushion. The material can be removed and washed separately at 60 °C. The cold foam on the underside is protected by the disinfectable PU cover. Suitable for decubitus prophylaxis and therapy, even with incontinence and obesity.

Cushion cover:

- 3 mm breathable spacer fabric (anthracite grey)
- Non-slip underside
- Washable at 60 °C

3DEA® VITAL wheelchair seat cushion

Breathable, pressure relieving seat cushion

3DEA® provides an ideal microclimate within the cushion. The material can be removed and washed separately at 60 °C. Suitable for decubitus prophylaxis and therapy, even with obesity.

Obtainable in various sizes and heights.

3DEA® wheelchair seat cushion

Pressure relieving: 3DEA® spacer fabric

3DEA® MADE TO RELAX

3DEA® CARE products

These thermo-regulating and pressure relieving products are suitable for care, decubitus prophylaxis and therapy. The 3DEA® material on the upper side provides the right degree of point elasticity and resilience – the body is supported precisely where it's needed. 3DEA® is breathable, even under a disinfectable cover it prevents heat build-up and improves the microclimate. Hence the products contribute to a greater feeling of well-being and quality of life as well as efficient therapy management and decubitus prophylaxis.
